

### **Corona Suspicion - What do I do?**

I'm worried that I've become infected.

### **Protecting others**

Avoid contact with other people to protect those around you from possible infections. Stay at home!

### **Advice via telephone**

Call your GP.

He will inform you about the next steps to take. DO NOT go to the GP in person and do not go to the emergency in the hospital – there you can infect others.

You can also call the emergency medical service (tel. 116117) or the Helios Corona hotline (tel. 0800823456).
